96 Stratulated granite, *Scotland*; fibrose green carbonate of copper, *Moldova in the Bannat*; a mammillated spar, and three others

97 A large rhomboidal selenite, *Oxfordshire*; and a green veined serpentine stone, from *Bamffshire, Scotland*
98 Heliotropium, from *Arabia*, a blue carbonate of copper, a tin ore, stalactitical spar, and four others
99 A rare Caledonic septarium, from *Tuscany*; crystallized iron ore, from *Elbe*; and a polished spar
100 A polished slab of labrador feldspar
101 Tubular coral in limestone, and two masses of encrini, *Derbyshire*; a large echinus galeatus, a cast in flint of another of the same species, and a specimen of silicious fossil wood
102 A gryphites oyster, part of a tortoise asterias, two cordated echini, a distaff, and other fossil shells, &c.
103 The marbled oriental pecten, the Chinese spindle, and four others
104 A fine pheasant turbo, *New S. Wales*; a scarce triplex, a rare colus, and three others
105 A bishop's mitre, two alatæ, and three others
106 The basket clam, a stellated balanus, conus miles, and three others
107 A large and fine compass pecten
108 A large green and pearly snake shell, from *China*
109 The lineated buccinum, *New S. Wales*; the tuberculated alatus, and four others
110 A small nautilus Pompilius, the conic bronze limpet, a young bull's mouth helmet, and three others
111 Black hæmatite iron ore, in large stalactites, Triers; a group of selenites, Oxfordshire; and denticular spar, Derbyshire
112 Appatite, Schalackenswald, Bohemia, *rare*; red zeolite, Dunbarton, scarce; and grey silver ore, Saxony
113 An interesting group of crystallized phosphorescent blend, on white quartz, Capnic
114 Green oxyd of copper sprinkled with blue, on a ferruginous matrix, Bannat; yellow sulphate of barytes in long crystals, and an iridescent foliated iron ore, Elbe
115 Green emerald fluor, Cornwall
116 Native oxyd of bismuth, aggregated with pink arseniate of cobalt, and green oxyd of nickel, *rare*; grey silver, Saxony; iron ore, Wales; and sulphate of copper, Mona mine
117 Blue crystallized malachite, Moravia—a very fine specimen
118 Chromate of lead, Siberia, rare; deep-coloured amethystine quartz in agate, Bohemia, and another
119 Rich velvet iron ore, Glamorganshire—a very fine specimen
120 Capillary bismuth, an extremely fine specimen
110* Sulphate of strontian, Clifton; a beautifully crystallized iron; sulphate of copper, Mona; and a large crystal of amethystine quartz, Bohemia

111*Fine spathose iron ore, South Wales, rare; arborescent native silver in the matrix, Hungary; and oxyd of copper with lead and calamine, Scotland

112*Native sulphur in the matrix, Spain; yellow and white sulphate of barytes; and foliaceous iron, Elbe

113*A very complete series of Continental marbles, serpentines, and other stones—cut and polished

114*Sulphate of barytes, of a brilliant topazine colour, crystallized in large prisms—a specimen of exquisite beauty

115*A capital group of rock crystals, intermixed with laminated purple cubic fluor, and marcasites containing tungstein

116*Purple fluor mixed with fragments of encrini, *rare*, from *Derbyshire*; ribband jasper, *Siberia*; cubic fluor frosted with brilliant crystals of quartz and spar, *Durham*; and a pyrites

117*Two specimens of silicious fossil wood, a scarce red oriental jasper, an Arabian agate, and a box formed of pudding stone

118*Two cones two patellæ, a New Zealand ear, and four other shells

119*Three corallines, the tape and two other millepores, an Isis hippuris, a specimen of red coral, and two others

120*A scarce brown triplex, *Tranquebar*; an unicorn scoop, a black scoop, and nine other shells

End of the First Day of Appendix.

SECOND DAY.

Wednesday
~~Tuesday~~, *the* 15*th of July,* 1806.

121 CONICAL cap, Nootka Sound; and part of an African musical instrument, formed of snakes skin, &c.
122 Sleeping stool, Otaheite
123 Feather and shell necklaces, Sandwich Isles; and sundry ornaments of North American Indians.
124 A pig in armour, and a Guana lizard
125 Two long war-clubs, New Caledonia
126 A carved ditto, and another, Friendly Isles
127 A beautifully carved ditto, from ditto
128 A great variety of shells of different genera
129 The deep pecten of Providence Island, an uncoated trochus, and a turnep shell
130 The duc cone, a lineated rhombus, an uncoated Iris snail, and various other shells
131 Two curious long war-clubs, Friendly Isles
132 Another of singular shape
133 A carved ditto
134 Feather and shell necklaces, combs, &c. S. Sea Isles
135 Head of a ram, with three horns
136 War-club Friendly Isles
137 A long ditto, from ditto
138 A ditto, from New Caledonia
139 A partridge tun, a scarce murex, and four other shells
140 The brown star limpet, a devil murex, and ten others
141 The pyramid trochus, the yellow knobbed fig, and two others

142 Long war-club, Friendly Isles
143 Another of similar shape, but finely carved
144 Short war-club, from ditto, curiously carved with a variety of forms and figures
145
146 A piece of bark cloth, from *Otaheite*, and another from the Friendly Islands
147 Ditto
148 Sleeping stool, and salt dish, Otaheite
149 Beak of a pelican, part of the ribs of a seal, and the horn of a rhinoceros
150 Basaltic adze, Sandwich Islands
151 A fine mottled purple fluor, sprinkled with spathose iron
152 Stellated baroselenite, and lead, Wales, *rare*; iron ore, Germany; calcareous deposition on moss; black copper, Italy, &c.
153 Two delicate varieties of purple fluor; sattin-like malachite, North Wales; two marcasites, and another
154 Crystallized iron ore from a mountain in North Wales; gypsum, Severn; and tabular barytes
155 White lead in galena, Scotland; stalactitical iron ore in spar, Herefordshire; dark fluor, Durham; and three other minerals
156 Tin in large crystals, Cornwall; purple copper, and green arseniate of ditto, &c.—six specimens
157 Brilliant mundic, Ecton; denticular spar, and another
158 Rich sulphuret of copper, Snowdon; white gypsum, Severn; stellated baroselenite, and spar, both from Wales
159 Prehnite, Scotland; resin tin, *fine*; truncated galena, &c.—six specimens
160 Black manganese containing nigrillo silver, a delicate acicular spar, and a variety of vitriolated lead
161 Nine small minerals, English and foreign—some rare
162 Tellurium, from Nagyag; two specimens of corundum, *E. Indies*; a jasperized iron ore, and a malachite carbonate of copper
163 Eight curious ludii naturæ in flints, and an Egyptian pebble
164 Jasperified fossil wood, from *Coberg*; emery, from *Turkey*; porcelanite, *Worcestershire*, and three more
165 Dendrites in slate, from *Florence*; serpentine stone, *Turkey*; a slab of dendritical bismuth, *Saxony*; a jasperified fossil wood, *Coberg*; and two gypsæ
166 A rock crystal, having curious internal appearances, a malachite copper ore, a large Scotch garnet, an Egyptian pebble, a barytes and an actynolite

167 Octohedral green fluor, *Devonshire*; plated sulphate of barytes, *Hartz*; cubic and octohedral galena, *Leicestershire*; and a silicious iron ore

168 Green actynolite with quartz, *Almaden in Spain*; spar, in crystals of thirty sides each, *Derbyshire*; granulated iron ore, *N. America*; and a singular calcedony with quartz, spar, &c. *Palatinate*

169 A scarce pecten, from *Van Diemen's Land*; a large parasol limpet, and a knobbed Arabian trochus

170 The stellated balanus, a scarce white rhombus, and seven other shells

171 A large and fine spotted melon shell, from *China*

172 The conic bronze patella, an uncoated rugose sun, a lineated buccinum, and three others

173 The brown rayed satchel clam, a small tower of Babel, a scarce olive, and nine other shells

174 A small spotted melon, an occidental argus porcelain, and a scarce winged shell

175 A Iris ear, a large tellina fausta, a rare purple gryphus and a scarce pecten, *Van Diemen's Land*

176 The peppered, and another rare clam, a pheasant, and a waved emerald snail, *Van Diemen's Land*, and two other shells

177 Fifteen fossils, plants, cone in cone corralloid, &c.—various

178 Seven vegetable impressions; cast of a crab, Sheppy; and sundry other fossils

178* An iron nodule with two distinct impressions of fossil plants, a fern with elongated leaves, an impression of a rare bark with lozenge-form reticulations, &c.—seven specimens

179 Four varieties of fossil plants; and impression of a fish, *Euphrates*

180 Sundry fossils

181 An uncommonly compleat impression of a fish, apparently of the clupea genus, with all the fin rays visible, and skeleton, perfect—Papenheim

182 Very fair impression of the middle portion of a fish, from the Euphrates, and five other petrifactions

183 Impression of a fish, nearly compleat, from the former place, and a mass of turbinated shells

184 Vegetable impression in iron and coal slate

185 Ditto, various

186 A slab of gray slate, impressed on one side with reeds, and on the other, with a large sulcated bark—*a capital specimen*

187 A handsome group of white stellated coral

188 Tubipora musica, isis hippuris, millepora muricata with the rudiments of red coral, madrepora gyrosa, &c.—six elegant corals

189 Nautilus Pompilius

190 Turban echinus, violet spined ditto, lacunosus Penn, &c.—eleven specimens

191 Spondylus, spotted tun, small harp, and five other shells

192 A sole oyster, a clouded mitre, the lesser swamp club, and nine others

193 The leopard and panther needles, two screws, an uncoated ear, and a fan scollop

194 Lepas anatifera, the carved murex, the divided mussel of New Zealand, and eight more

195 A young leopard porcelain, *Otaheite*; a poached egg licium, *ditto*; the tiger chersina, and a mya arenaria

196 A scarce triplex, *Nootka Sound*; the shower clam, and ten other shells

197 The white variety of the European cepa, the black limpet, and seven others

198 The undulated volute, an armed scoop, and a pheasant snail

199 The spider's web cone, a scarce trochus, and seven others

200 The rasp cockle, a scarce purpura, a bason tellen, and six others

201 A scarce orange buccinum, a rare mussel, one valve polished, and the great ear shell

202 The tawny, and two other rare species of bats, and a young opossum, from *Louisiana*

203 The red-faced parrokeet, the roller, and another rare bird

204 The red barred toucan, from *S. America*, rare

205 The paradise tanager, and two other rare birds

206 The Jackamira, from *Cayenne*; and a chequered woodpecker, *Louisiana*

207 The manura superba, from *New S. Wales*

208 Tufted duck, male

209 Alauda magna, yellow-breasted lark, m. and fem.

210 Great crested grebe, young

211 Lesser weasel, and another

212 Large brown American rat, and another

213 Shear-water petrel, Scotland

214 Thick-kneed plover

215 Red-breasted twite

216 A pair of pink-mouth alatæ, and a large trochus

217 Cock-wing clamp, spotted melon, and another

218 Red and white spondylus, rare; nutmeg cowry, bat volute, and three other shells

219 Furbelowed clamp; carinated murex, New Holland, and a snake

220 Long-spined spondylus, bat volute, nutmeg cowry, &c.—twelve specimens

221 Fourteen limpets, various, some scarce

222 A beautiful and perfect madrepora

222*The painted limpet, the Quaker helmet, and a many-ridged cardium, *New S. Wales*, a rare colus, and two other shells

223 A large Arabian trochus partly uncoated, and a sulcated sun shell

224 The spotted and another distaff, a black club, a bishop's mitre, the brown ark, and a mussel

225 Two scarce ears, two rare cones, and five other shells

226 The cinnabar scollop, two cardia, and three others

227 Cardium muricatum, rhombus despectus, a conic bronze limpet, and six others

228 Nine varieties of alabaster, from *Tuscany*; and two other gypsæ

229 Crystallized native sulphur, from *Spain*; native oxyde of manganese with crystallized quartz and schistose mica, *Scotland*; and a crystallized yellow copper ore, *Staffordshire*

230 Dendritæ on laminated marl, *Florence*; a granatine, from *Tortono*, in *Italy*; and a polished fluor, *Derbyshire*

231 Crystallized carbonate and phosphate of lead; asbestos, from *Bamffshire*; a cockscomb pyrites, *Derbyshire*; and an Egyptian pebble

232 A pair of slabs from a beautiful fortification-like agate, and a silicious fossil wood

233 Antimoniated galena with spar, Leicestershire; steel-grained galena rich in silver, Halkin Mountain; ruby copper, Cornwall; mica in spar, Altenburgh; &c.

234 Shorl in spar, Germany; iridescent galena in octohedral crystals, vitriolated lead in an iridescent matrix, green fluor with copper, &c.

235 Clear yellow sulphate of barytes, in prisms; delicately crystallized white lead, Scotland; and foliated iron ore—all fine

236 Sulphuret of tin, containing according to some, native tin, Cornwall—very rare; elastic bitumen, rare; and ruby copper with green malachite

237 Salmon-coloured spar formed on pointed spar of a golden hue, very uncommon, North Wales; amber, Suffolk; and ruby copper, Cornwall

238 White lead in fasciculi, Scotland; black hæmatite iron, Germany; columnar spar, Somerset; and three more

239 Native sulphur in the matrix, Spain; native and ruby copper, Cornwall; serpentine with amianthus, North Wales; &c.

240 Galena in cubes, blend with pearl spar, and galena with cauk

241 A handsome polished slab of encrini marble, Derbyshire; and ditto of labrador

242 Fine dark green emerald fluor, Cornwall; oxyd of copper and phosphate of lead, Scotland; and amethystine quartz

243 Brilliant peacock foliated iron, Elbe

244 Jet-like fossil wood imbedded in grit-stone, and intersected

244* Topazine sulphate of barytes, in aggregated crystals, a fine specimen

245* Stellated baroselenite partially coated with oxyd of iron, rare, Wales; sulphate of strontian, Monmouthshire; blend on quartz, &c.

246* Six small minerals, prehenite, Scotland; iron, Wales; tin in quartz, arseniate of copper, and green phosphate of lead
with veins of galena: a singular and scarce mineral, and Scotch Hebraic granite

245 Lithanthrax from the coal mines of Hesse, extremely rare; and grey silver ore, Saxony

246 A very fine carbonate of copper, crystallized in stellated fasciculi of a fine green colour, Bannat

247 Reticulated millepores, and anomiæ in limestone, *Dudley*; a mass of spiral fossil shells, from *Austria*: parts of encrini, *Derbyshire*; fossil plants in coal, *Stourbridge*; and a large echinus

248 Peritified fossil wood, *Whitby*; a fish's head in marl, *Papenheim*; two reverse whelks, a madrepore with crystallized quartz on it, &c.

249 Various fossil shells, an echinus pileatus, some joints of encrini, teeth, and other parts of fishes, &c.

250 Seven curious fossil plants, from *Northumberland*; &c.

251 A fossil fish with rhomboidal scales in black slate, from *Isleben*; and a skeleton of a fish in yellow laminated marl, *Papenheim*

252 Highly phosphorescent blue and green fluor, *Aberdeenshire*; rich cinnabar, *Almaden*; hornblend, *New Castile*; a porphyry, and two others

253 Crystals of feldspar, from *Carlsbad, Bohemia*; plumose silver ore on rock crystals, *Freyberg*; green actynolite, *Scotland*; and a gypsum, *Derbyshire*

254 Two of the Pietra di Coba, or poison suckers, *E. Indies*—very rare; a rock crystal with hair-like titanium inclosed, and another with curious internal appearances, *Brasil*

255 A large and fine slab of the iridescent feldspar, rich in a variety of colours, from *Labrador*

256 The great ear, from *Van Diemen's Land,* and a Chinese window shell

257 A scarce terrestrial shell, from *S. Carolina*; a large rosarium, a triangular buccinum, and nine others

258 The aculeated cassidula, two alatæ, and three other shells

259 The Cape horn variety of the unicorn scoop, the sad scoop, a scarce variety of the spotted clam, and six other shells

260 The lesser oriental mother of pearl shell, *one valve uncoated,* and a large fresh water mussel

261 Two clubs, the scarlet pecten, from *Guinea*: and nine others

262 Cochlus singularis, and a scarce pectunculus, *New S. Wales*; a beautiful variety of the plough alatus, and a group of balani

THIRD DAY.

~~Wednesday~~ Third day, the 16th of July, 1806.

261 THE duck's foot and another scollop, an oriental oyster, and three other shells

262 The lizard rhombus, from *China*

263 A polished silver-bronze limpet, a waggon road scoop with a number of serpulæ adhering, and four other shells

264 The purple fluted mussel, *Straits of Magellan*; the pallid rhombus, *New Zealand*; a mulberry trochus, and three other shells

265 The ridged trumpet, the tiger chersin, and an uncoated trochus

266 A telescope and a Hercules's club, mytilus pictus, and three other shells

267 The ramose triplex, a scarce alatus, and two others

268 Cardium Æolicum, a beaded fig, a bat volute, and three others

269 Calamine coating calcareous spar, both partially decompoed, Flintshire; red zeolite, Scotland: amethystine quartz, in a nodule; and green carbonate of copper, Montgomeryshire

270 Flesh-coloured gypsum, Severn; octohedral ruby copper, and another

271 Iron in stalactites, Monmouthshire; violet quartz, in agate; singular calcareous spar, formed in a nodule, &c.—six specimens

272 Solid ore of nickel, green nickel, flesh-coloured gypsum, Monmouthshire; tessalated galena, and four others

273 Beautiful pearl spar, Hartz; silky carbonate of copper, Bannat; lava, Etna; and curious calcareous spar, Derbyshire

274 Native copper in spar, Siberia, *rare*; sulphate of strontian, Bristol; and two others

275 Tin, Cornwall; garnets in the matrix; rock crystals sprinkled with pearl spar; black shorl in quartz, Switzerland

276 Prehnite, Scotland; chalcedony in stalactites, copper, &c. —six minerals

277 A slab of pudding-stone, polished, Herefordshire; ditto landscape marble, Cottam; a singular concentric marked ferruginous stone, Bohemia; bloodstone, and a small septarium

278 A large slab of polished labrador

279 Grey native silver in calcareous spar, Hartz; white carbonate of lead, Scotland; and garnets in a micaceous matrix, Etna

280 Curious dendritical marble, Germany; two serpentines, and three other polished stones

281 Red stellated antimony, *rare*; green and purple oxyd of copper, Durham; and pearl spar, Cumberland

282 A small slab of flexible sandstone, Brasil; green quartz in brown mica, New England; and prehnite

283 Twenty-four sided purple fluor, Cornwall—*rare*; green fluor on white quartz, ditto; and blend, Cumberland

284 Rich bubbled copper, Cornwall; green phosphate of lead, Scotland; and elastic bitumen in the matrix

285 Looking-glass copper ore, Germany, *scarce*; well-defined truncated cubic galena, Derbyshire; brilliant octohedral galena, and bright purple blend on grey fluor, with bevelled edges

286 White quartz with marcasites, and ditto with pearl spar—two large specimens

287 A large crystallized specimen of a curious variety of yellow sulphate of barytes

288 Spar on stalactitical iron, North Wales; rich copper with cubic fluor, Cornwall; veined galena in spar, and two more

289 Black oxyd of manganese, beautifully crystallized, Aberdeen; violet quartz, &c.—five specimens

290 Yellow calcareous spar very delicately crystallized, *Hartz*

291 Carbonate of barytes, Scotland—*rare*; finely coloured topazine sulphate of barytes; iron ore, Wales; dark green arseniate of copper, &c.—eight small specimens

292 A large polished slab of fortification agate, Oberstein; ditto of labrador, and denticular spar

293 Harmastone, Scotland; green oxyd of copper, &c.

294 Bright green fluor, Cornwall; antimoniated galena with octoedral crystals, Leicestershire; and blue spotted carbonate of copper, Durham;—all fine
295 Six varieties of elastic bitumen, Derbyshire—*rare*
296 Green phosphate of lead, lead-hills, iridescent galena, brilliant calcareous crystals and another
297 Green shirl with mica, Tryol—a capital specimen
298 Stellated baroselenite, North Wales—rare; fluor sprinkled with pyrites, galena, &c.—five specimens
299 Solid green malachite, Siberia—very fine
300 Nine minerals, various
301 Bones in spar, two varieties, Gibraltar, and other petrifactions
302 Vegetable impressions, various
303 Ditto
304 Singular vegetable fossil barks
305 Echini, and various other petrifactions—some rare
306 Belemnitæ, vertebral joints of fossil alligator, &c.
307 Sundry curious petrifactions
308 Beautiful vegetable impressions
309 Stems, fossillized barks, and other vegetable remains
310 Various fossils, several uncommon
311 Clear impression of a fish resembling the weaver *Calliony-mus*, found by Mr. Dawson on the banks of the Euphrates
312 A very fine vegetable impression of a ramose plant, with reticulated bark
313 Singular green shirl with hornstone, Sweden; green shirl in mica, Tyrol; amethystine quartz, and another
314 A choice specimen of green plumose copper, Bannat; and columnar crystals of yellow barytes
315 An uncommonly rich peacock iron with a bronzed bubbled surface, and cinnabar; and a fine specimen carbonate of barytes
316 Velvet iron, South Wales; sulphate of strontian, &c.—five specimens
317 Tungstein, Bohemia—*very rare*
318 Singular gypsum in argil, Monmouthshire; stellated baroselenite with lead, Wales—fine and rare; yellow sulphate of barytes, and another
319 Beautiful bubbled pearl spar with double pointed crystals of quartz, *Hartz;* cubic fluor coated with calamine, Flintshire; silvery mica, Scotland; &c.—twelve specimens
320 A fine piece of flos-ferri, Steurmark; topazine barytes, and three others
321 Green and purple cubic fluor; zeolite, Scotland; galena on chert, Aberiswith; &c.—six specimens
322
323 The marbled and gold-mouth snakes, an egg cockle, two grey thorny woodcocks, and four other shells

324 The iridescent oyster corroded by boring mytili, from Anamaboo; and a ramose triplex

325 A large and fine green and pearly snake shell, from *China*

326 The coronated and orange clouded needles, an American mytilus, and two other shells

327 Millepora foliacea on its native rock; madrepora tibicina, from *Sicily*; and a tubipora musica

328 Mya truncata, pecten marmoratus, a polished margaritifera, and three others

329 The long mussel, from *Barbary*, polished; and a young Arabian spindle shell

330 The serrated Venus's heart cockle, chiton olivaceus, a furlowed rhombus, the lesser French horn, and two other rare shells

331 Cone in cone corralloid, Wales; septarium marble cut and polished, and three more

332 A delicate and pleasing group of rock-crystals intermixed with blend, Hungary; green oxyd of copper, Scotland; and calcareous stone, containing silver, Germany

333 Fine grey stellated antimony; white gypsum, Severn; peacock copper, ruby copper, and another

334 A polished slab of grey marble replete with sparry casts of shells of the ammonite genus

335 A beautiful specimen of cock-comb iron, North Wales; and another of *Bristol celestine*, or blue sulphate of strontian

336 Yellow phosphate of lead; slickenside, or looking-glass spar; peacock sulphuret of copper, Cornwall; and another

337 A large and fine specimen of dark green mica with shorl, and spar, Altenburg

338 Green and red serpentine with amianthus, North Wales; fluor, and vitriolated lead

339 Green copper, in hexagonal plates, Cornwall; pink gypsum, Monmouthshire; sulphate of strontian, sattin spar, and two more

340 An elegant cabinet specimen of flos-ferri; elegantly crystallized green oxyd of copper, Scotland; chalcedony, Cornwall, &c.

341 Flesh-coloured gypsum, rare: fine crystallized oxyd of cobalt, two spathose irons, &c.—six specimens

342 Dark cubic fluor, internally sprinkled with marcasites—a beautiful group

342* Velvet iron ore, rare; beautiful stellated green arseniate of copper, Cornwall; radiated baroselenite, *rare*, &c.—eight specimens

343 Black iron ore, in feldspar, Germany; native copper, Siberia; white lead Scotland; &c.—eight specimens

344 An interesting series of asbestos, as in bright green serpentine, *Wales*; in dark serpentine, Scotland; cross-grained

asbestos, America; fasciculated, Bohemia; white sattin-like, Corsica, &c.

345 Singular spotted stone, Aleppo; basalt, carbonate of barytes on blend, &c.—six specimens

346 Platina; rich grey silver ore, Germany; peacock copper, prehnite, native copper, &c.—ten specimens

347 Plated grey iron with reticulated surface, *rare*; figured granite, Scotland; arseniate of copper, fluor, with bevelled at the edges, &c.—eight specimens

348 Witherite, Scotland; crystallized chromate of lead; fine ochre, Canarvonshine; and three others

349 Zeolite in basalt, Scotland; lead with calamine, singular blend, on octoedral galena; gypsum, Wales; native copper, &c.

350 Egyptian pebble exhibiting a lusus head, beautiful green marbled agate, antique ditto, and other polished stones

351 Stellated beroselenite, finely crystallized, Wales, *rare*; native cinnabar, Idria; native copper, Cornwall, &c.

352 Resin-coloured tin in large crystals, *rare*, Cornwall; trihedral blend, on cauk; sattin spar, and five others

353 Adamantine spar, East Indies, rare; elegant tabular barytes, Bohemia; garnets, bastard opal, and a variety of other small minerals

354 Elbe iron, crystallized—a specimen of uncommon beauty

355 Native gold in a group of crystallized quartz, Brasil; a capital specimen

356 An uncommonly fine specimen of topazine sulphate of barytes, crystallised in prisms, very rare in this perfection

357 Green phosphate of lead, beautifully crystallized, Scotland; emerald fluor, in white quartz, Cornwall; antimoniated lead ore, and blue oxyd of copper in sand-stone

358 A fine specimen of Cook's comb iron, N. Wales; and amethystine quartz, Palatinate

359 Crystallised mundic, in truncated cubes; peacock lead ore, on white quartz, green fluor, on ditto

360 Three rare snails, and other small scarce shells, papal volute, harp, and a variety of other shells

361 Pinna ingens, Venus chioxe, and various other shells

362 Turban echinus, East Indies; rare purple spined ditto, two scarce placentæ, and three others

363 Zig-zag-lined clamp, scarce, a fine orange-mouth alatus, and a spider strombus

364 Sixteen species and varieties of the cypræa genus, some scarce

365 A fine oriental triplex, pied mulberry harp, banded nerit, and two other shells

366 The hammer oyster, pulo condore

367 Venus heart cockle, *rare*; a scarce spondylus, and two ringed snails
368 Chama hippopus, or bear's paw clamp, East Indies, a scarce tuberculated alatus, and a spotted cowry
369 An elegant stellated madrepore
370 A group of balani, two senecti, and three other shells
371 A large moor rhombus, and an Arabian spindle shell
372 A pheasant snail, a South Sea snake, and four others
373 Section of a large spotted melon, and a young conch
374 A scarlet pecten, a lantern buccinum, and fourteen others
375 A large fan pecten, with adhesions of two species of serpulæ, a young zebra alatus, and two others
376 A vice admiral, and another rare cone, the pottle whelk, and twenty-two other shells
377 A scarce senectus, the cinnabar scollop, and a pyramid trochus
378 A dolphin, the furbelowed rhombus, the denticulated whelk, and three others
379 A group of serpula semi-muricata, with adhesions of other species of the same genus, and a large partridge tun shell
380 Eight various impressions of fossil plants in argillaceous iron ore, coal slate, &c.
381 Bones of the head of a fish in marl, *Sheepy Island*; and two skeletons of fishes in yellow laminated marl, one with dendritæ, from *Florence*
382 A group of lepas tintinnabulum, a scarce variety of the antique purpura, and four other shells
383 A magpie, partly uncoated, a zigzag scollop, and a spider shell
384 Various species of diadem, and other echini, spines, &c.
385 A grimace, and a muricated buccinum, an egg cockle, and three others
386 The Chinese window shell, and a black hammer margaritifera
387 Pennatula phosphorea, and various species of asteria, &c.
388 The coronated melon, *rare*; the tiger chersin, and an iris ear shell
389 The giant indented oyster, from the *Friendly Islands*
390 The undulated volute, and a pheasant snail, with its operculum, *Van Dieman's Land*, and a beautiful polished bronze limpet
391 Two large specimens of cobalt in baryte
392 Compact zeolite, rose-coloured calcareous spar, and four others
393 Crystallized cobalt, looking-glass ditto, and steel-grained ditto
394 Adularia in basalt, grey copper ore, and four others
395 Four various specimens of cobalt, Hesse

396 Sundry specimens of coal, exemplifying the ligneous structure, and a singular crystal of gypsum
397 A capital specimen of brilliant crystallized grey cobalt with copper nickel
398 Native gold, Hungary; ruby silver, Hartz; and seven other small minerals
399 Rose-like gypsum, Hesse; and cyanite, Tyrol
400 A fine crystallized and fortification-like cobalt
401 Two specimens of crystallized quartz, Bristol; and garnets imbedded in mica, &c. Spain
402 Steel-grained cobalt, looking glass ditto, and four others
403 A large specimen of calcareous spar, and four others
404 Pink and brown oxyd of cobalt, and brilliant arsenial pyrites
405 Schaumerde, Hesse; calamine, cobalt, and grey copper
406 Dendritical nickel, with green oxyd, and dendritical cobalt
407 Oxyd of nickel, ditto of cobalt, and grey copper
408 Crystallized cobalt, Saxony; and oxyd of ditto, from Hesse
409 Crystalized uranite, ruby silver, and ten other small minerals
410 Black oxyd of cobalt

End of the Third Day of Appendix.

FOURTH DAY.

Thursday, the 17th of July, 1806.

411 A Balanus with an oyster adhering, section of an alatus, and three other shells

412 Two uncoated iris snails, a yellow grimace, five othershells and a hermit lobster in its cell

413 Cardium costatum, the pied American scollop, a spondylus, and three others

414 The pigeon's egg bulla, the footman buccinum, and eighteen others

415 The Arabian spindle, and another, in a young stage of growth

416 A boat limpet, the flame clam, the undulated cone, and six others

417 An uncoated S. Sea snake, the purple-mouth alatus, a group of scarlet serpulæ, *New Zealand*; and three other shells,

418 Phosphorescent blue and green fluor, *Aberdeenshire*; sulphate of lead, *Anglesea*; cystallized native oxyd of tin, *Cornwall*; and a singular spar

419 Dendritæ on yellow laminated marl, *Papenheim*; ditto on flint, *Norfolk*; iridescent feldspar, *Labrador*; and a red jasper, *Saxony*

420 Grey cobalt ore, *Cornwall*; galena in truncated octohedrons, *Derbyshire*; shorl in quartz, from *Valencia in Spain*; and three others

421 Tabulated sulphate of barytes, with crystallized quartz and pyrites, *Hartz*; schorlite, Saxony; sulphuret of lead in deeply truncated cubes, with crystallized blend, Cumberland; and a yellow copper ore, with pyrites and quartz

422 Grey silver ore with galena, *Saxony*; blue feldspar, *Steurmark*; a red feldspar, a septarium with pyritical septæ, and two others

423 Crystallized iron ore, from *Elbe*; striated gypsum, *Nottingham*; cubic fluor with blend, *Derbyshire*; and a polished stalactical spar with undulated veins, *same county*

424 Crystallized *Acantican* with quartz, *Arendahl in Norway, rare*; needle-like sulphuret of antimony, *Hungary*; and stellated zeolites, from *Iceland*

425 Part of a fossil fish, and a fossil lobster, *Sheepy Island*; a belemnites, a gryphites oyster, a mass of shells in limestone, *Austria*; and another, with fragments of encrini, Derbyshire

426 Eight various impressions of fossil plants in argillaceous iron ore

427 Black and resin-coloured tin, Cornwall; calcareous spar, curious, Hartz; cockscomb iron ore, Wales, &c.

416* Amianthus, North Wales; green carbonate of copper, and hæmatite, Colebrooke Dale

417* Stellated lead and baroselenite, Wales—*rare*; cockscomb iron ore, ditto, &c.

418* Singular stalactitical chalcedony, Cornwall; purple bubbled copper, ditto; and three other minerals

419* Vitriolated lead in clear white crystals, Anglesea; native copper with malachite, mica, and six other specimens

420* Pale rosy spar, crystallized on denticular spar of a golden hue, Wales; very curious magnetical iron ore, America; and three other minerals

421* Yellow baroselenite; white calcareous spar with reddish surface, Herefordshire; fluor with rich metallic gloss, &c.

422* Beautiful agate, Italian marble, ammonitæ, &c.—five specimens

423* Ten minerals, various, tin, galena, sulphate of barytes, &c.

424* Delicately crystallized white lead, Scotland; stalactitical iron with spar, Wales; fluor, vitriolated lead, &c.—seven specimens

425* Antimony in prisms, Dauphiny, *fine*

426* Rich iron ore with a beautiful and extremely delicate plush-like surface, Wales, *rare*

427* Delicate heath-like spar, Glocestershire; an onachine bastard opal, Hungary; rich yellow copper, blend, &c.

428 Red crystallized chromate of lead, *rare*; solid calamine, Scotland; hæmatites iron ore, and two others

429 White lead ore beautifully crystallized, and galena in truncated cubes

430 Wavelite, Devonshire; radiated baroselenite, green arseniate of copper, sulphate of strontian, &c.—nine specimens

431 Topazine sulphate of barytes, pitch-like iron, pearl spar, &c.—seven specimens

432 Barytes crystallized in tables, Germany; carbonate of barytes, Scotland; native cinnabar on limestone; striated calamine, Wales; and four other minerals

433 Native cinnabar, Ilfeld; hacked pearl spar, Germany; amethystine fluor, and three others

434 Thirteen small minerals, containing compact basalt or touchstone; staurolite on amethystine quartz; whinstone, Coromandel; and elastic bitumen

435 A variety of small minerals

436 Thirteen interesting small minerals, phosphates of lead, malachites three varieties, manganese, tin, &c.

437 Large group of cubic fluor in small crystals, partially coated with marcasites

438 Delicate plumose gypsum, Matlock

439 Large cube of purple fluor coated with rock crystals, two varieties of blend, copper, &c.

440 Three Sweedish iron ores, and three others

441 Four varieties of sulphate of strontian

442 Sundry mochas, &c. cut and polished; and two cut specimens of the Leverian sardonyx

443 Native oxyd of quicksilver, so rich as to yield 80 per cent. from *Idria*; topazine sulphate of barytes, *Surry*; and a mass of quartz pebbles cemented together by oxyde of iron, from *Switzerland*

444 Crystallised galena with a beautiful iridescent surface, *Derbyshire*; Hebraic granite, *Scotland*; crystallised mispickel with native oxyde of tin, &c. *Cornwall*; and native oxyde of quicksilver, from *Idria*

445 A large slab of grey feldspar, beautifully variegated with onachine spots of the brightest blue colour, from *Labrador*

446 White and grey actynolite, from *Tyrol*; and sulphuret of lead in large cubes, slightly truncated and aggregated with foliated quartz, tesselated pyrites, &c. from *Saxony*

447 White spar in crystals of 24 sides each, with cubic fluors, having bevelled edges, blend, &c. *Derbyshire*; cinnabar with iron ore and crystallized quartz, *Chili in S. America*; rich iron ore, *New York*; and a galena

448 Stalactitical zeolite, *extremely scarce*, from *Ferro*; and a crystallived manganese, *Aberdeenshire*

449 Cinnabar with iron ore, quartz, &c. *Chili*; malachites carbonate of copper; crystallised galena, rich in silver, *Freyberg*; and pearl spar on quartz, Hungary

450 Crystallized iron ore, from *Elbe*; and a beautiful blue and green carbonate of copper, &c. *Siberia*

451 A finely crystallised Saxon topaz; tourmaline, from *Ceylon*; a cat's eye, some Bohemian garnets, two agates, and a specimen of red native alum

452 A mass of fresh-water turbinated and bivalve shells in iron ore, *Sussex*; joints of encrini in limestone, *Derbyshire*; an alated oyster, *Oxfordshire*; and an ammonites

453 A fine fossil fish with rhomboidal scales, in black slate, from *Isleben in Germany*

454 Piece of the building of the termites of *Guinea*, wood perforated by termites, from the same country; some niduses of Vespæ, and other insects, &c.

455 Curculio Imperialis, and sundry other insects

443* Rose coloured calcareous spar in primitive rhombs

444* A fine crystallised red arseniate of cobalt

445* Dendritical nickel, *rare*

446* Looking-glass cobalt, with crystallised cobalt

447* A fine specimen of crystallized solid grey cobalt

448* Rose-coloured arseniate of cobalt, and barytes having a vein of gold crossing it

449* A capital specimen of light purple fluor, having its edges curiously tinged with deep purple

450* Crystallized zeolite, two cinnabars, and six other minerals

451* Nine various minerals, including some fine and rare

452* A very finely crystallised grey cobalt, Hesse

453* Remarkably large and fine stalactites, *Eham*, Derbyshire

454* Twelve various impressions of fish, &c. in coal slate

455* Three deal boxes containing sundry minerals

456* Two Chinese Buprestides, and various other Papiliones, Phalænæ, &c.

457* Various insects of different genera

458* Ditto

456 A fine specimen of jaspideous wood richly sprinkled with minute quartz crystals, Swindon, Wiltshire

457 A variety of volcanic productions, from Vesuvius, &c.

458 A beautiful small specimen of Brasilian native gold in the matrix

459 Native cinnabar; yellow blend, Scotland; blue and green malachite, Wales; and three other minerals

460 A large piece of the landscape Cottam marble

461 Fine spathose black iron ore and two others

462 Aluminous stone with copper and galena, crystallized alum, yellow blend, native cinnabar, &c.—eight specimens

463 Black blend on violet spar, dark amethystine quartz speckled with red, gypsum, and another

464 Beautiful calcareous spar, dark cubic fluor sprinkled with marcasites, denticular spar; and stalactitical iron ore, Germany

465 A group of singular spar with apatite, Hartz; and octoe-

dral galena frosted with double-pointed denticular spar, Leicestershire

466 Apatite with marcasites, Hartz; green malachite, iron, &c. eight specimens

467 Noble opal, semi-opal, crystal of beryl, Siberia; topaz, cat's eye, grey silver, quicksilver in cinnabar, &c.—sixteen interesting minerals

468 A very fine specimen of dendritical nickel, Hesse—*rare*.

469 Vitriolated lead, a fine specimen of the iridescent kind, and double pointed denticular spar

470 A capital mass of pearl spar with trihedral blend, in large crystals

471 Malachite on ferruginous ore, white lead and selenite in galena, &c.—six

472 Seventeen interesting minerals, among which are titanium, iron in crystals, Bohemia; yellow, red, and white arsenic, elegant tabular barytes, Cremnitz; tin, &c.

473 Octoedral ruby copper, Cornwall; dark cubic fluor with marcasites, and crystallised phosphate of lead

474 Capillary silver in the matrix; and a finely crystallised white lead

475 Ten various European fishes, curiously preserved on paper

476 A scarce pecten, from *Van Diemen's Land*; the spotted and partridge tuns, a Medusa limpet, an oriental oyster, and an ear shell

477 A fine iris ear shell, from *New Zealand*, uncoated and polished

478 A mince-pye star-fish, a twelve-rayed and three other asteria, and a sygnathus hippocampus, or little sea-horse

479 The crimson-mouth chersina, a rare terrestrial shell, from *Guinea*; and a vase murex

480 The mottled hound's ear margaritifera, from *China*—very scarce; the pitch solen, and a striated Virginian mussel

481 The granulated, a new species of trochus; a scarce patella, and a pheasant snail, from *Van Diemen's Land*; the cream-coloured pectunculus, and two other shells

482 A small specimen of the great indented oyster, from the *Friendly Islands*

483 The lesser antique lamp, a curious and extremely scarce terrestrial shell, (allied to Helix ringens Linn.) from *Brasil*

484 A fine voluta fluctuata or undulated volute, from *Van Diemen's Land*

484* A large and fine haliotis suberba, or superb ear shell, the pearly inside of which is finely coloured, from the *Gallapagos Isles*, in the Pacific Ocean—*very rare*

485 Millepora foraminosa, or lace coral; a delicate specimen of millepora tubipora, and a singular variety of gorgonia

pretiosa, or red coral—all from *Sicily*; and a tubipora musica, from *Arabia*

485* A singular water-bucket, formed of a cornuted helmet of *extraordinary size*, from an island in the *South Sea*

486 The Jackamira, and another rare bird

487 The orange-faced parrokeet, *Lousiana*; and the green certhia, *rare*, from *Sandwich Isles*

488 The spur-winged water-hen, from *S. America*—very scarce

489 The ivory beaked or great crimson crested woodpecker, from *Louisiana*—rare

489* The scarlet ibis, or curlew, from *S. America*

490 A very fine specimen of that curious bird the *Menura superba*, from *New S. Wales*

491 Cornuted ostracion, or trunk-fish, and another curious fish

492 Toad, lophius fish, and another

493 Wagtail, m. and fem. and redwing

494 Spotted necked turtle-dove, m. and fem.

495 Motacilla stapazina, buff-wheatears, Africa—*rare*

496 Shoveler duck

497 Summer titlarks, m. and fem. and another

498 Spotted fly-catcher, motacilla grisola

499 Weasel, and another

500 Cheshire grebe, female and young

501 Fifty specimens of sea-weeds disposed in six compartments, without frames—an interesting series

502 Eleven small shells chiefly of the voluta genus, some scarce

503 Madrepora fungites, a fine specimen

504 Prince of Orange flag chersinæ, murices, an arca, &c.—twelve

505 A pair of voluta cardinalis, ditto of the bat volute, and another, a scarce tuberculated alatus, and three other shells

506 Devil's claw strombus shell

507 Seven impressions of curious fossil plants, in argillaceous iron ore and coal slate

508 A long nodule of grey marl split in two and discovering the skeleton of a fossil fish imbedded therein, *extremely curious and rare*, from *Greenland*; and part of a fossil pentagonal asterias in chalk, from *Kent*

509 A beautiful red veined pebble, from the *Palatinate*; and a large and fine plate of oriental mocha stone

510 A variety of curious dried plants from *New South Wales*

511 Hammites, or roe-stone from *Rutlandshire*; white actynolite, from *Tyrol*; zeolite in trap, *Isle of Sky*; schorlite, *Saxony*; and two others

512 Two beautiful oriental agates; and a scarce violet granite, from the *East Indies*

513 Native quicksilver in globules, on the surface of cinnabar, and native oxyd of quicksilver, from *Idria*; and a specimen of stellated needle-like sulphuret of antimony with baroselenite, from *Felsobania*
514 Two very large and fine plates of oriental mocha stone
515 Three varieties of the Brasilian topaz, in their native form; a cat's eye, an oriental aqua marine, two Bohemian garnets, and a beautiful calcedony
516 A specimen of the iridescent feldspar of *Labrador*, rich in the most beautiful colours, and extremely vivid
512* Double horn of a rhinoceros
513* Remarkble long single horn of ditto
514* Pair of branched stag's horns, with singular brow-antlers
515* Horns of an antelope
516* Buffilo horns of uncommon magnttude
517 A Fine slab of flexible stone
518 A beautiful specimen of wood jasper
519 A fine Spanish avanturine
520 Three cut and polished specimens of the Leverian sardonyx
521 Nine beautiful varieties of arseniate of copper
522 Five crystallised tins, native arsenic, and three others
523 Crystallised uranite, iridescent blend, auriferous pyrites, and six others
524 Mispickel, lazulite, native gold, ruby silver, and four others
525 Crystallised tin and six others
526 Two specimens of native gold, calcedony, and oxyd of cobalt
527 Native gold, and three others
528 An extremely fine and perfect light-coloured impression of a fish in coal slate, Hesse
529 Hyalite, and eleven others
530 Lazulite, zeolite, and sundry others
531 Sundry minerals
532 A large and fine specimen of oxydated cobalt
533 Brilliant looking-glass cobalt, and black oxyd of cobalt
534 Three various cobalts
535 Dendritical nickel and three cobalts
536 A beautiful specimen of rose-coloured and brown oxyd of cobalt, Hesse
537 A lot of small minerals including uranite, &c. &c.

End of the Fourth Day of Appendix.

FIFTH DAY.

Saturday
~~Friday~~, *the* 18*th of July*, 1806.

538 A Large German agate, jaspideous wood, and another
539 Aurum graphicum, native gold, and sundry others
540 Sixteen specimens, including a series of cobalts, some very fine
541 A variety of minerals
542 A capital specimen of fortification cobalt, and pink oxyd of ditto
543 Looking-glass cobalt, and a fine crystallised ditto
544 Silvery selenite, and two fluors
545 Sundry minerals
546 Crystallised molybdate of lead and five others
547 Iron geodes, Nassau siegen, and two others
548 A beautiful purple fluor, and a yellow ditto
549 Two curious dendrites, and two others
550 A capital specimen of brilliant solid grey cobalt

545* Beautiful pale fluor, frosted with twenty-four sided calcareous spar, Derbyshire
546* Stellated antimony on white quartz, Felsobania; singular tin, in shorl, rare, Cornwall; and brown spathose iron partly coated with smoky spar, Germany
547* Barytes in tabular crystals, purple fluor, and pearl spar coating denticular spar, Hungary
548* Rose quartz; grey copper, Carinthia; and ruby copper
549* Garnets in micaceous matrix, Mount Etna; mammillated iron ore with crystallised surface, Herefordshire; and plumbago, Cumberland

550*Large portion of an angulated asterias in chalk, having the outer margin, and three processes nearly perfect, *rare*, Kent; and two scarce mammillated echini, in chalk

551 Fossil wood, coral, shells, and sundry other petrifactions

552 Remarkably large and fine impression of a striated fossil bark, and a compressed reticulated stem, with part of the pith remaining

553 Petrifactions, various

554 Bones in spar, Gibraltar; petrified wood, variety of echini, and other fossils

554*Remarkable vertebral bones in Papenheim marl; impression of a fish, ditto; mammillated echini; and part of an asterias in chalk, Kent—*rare*

555 Delicate mammilllated and plumose green and blue malachite, Voigtland; amethystine quartz in agate, and black shorl

556 Occellated agate, Palatinate; a handsome group of rock-crystals frosted with pearl spar, and quartz with plumose copper

557 A choice specimen of crystallised iron ore, Elbe; and crystallised sulphate of barytes of a fine topazine colour

558 Plumose fasciculated white lead, and selenite, N. Wales, rare

559 Iron ore with a rich velvet-like surface, *Wales—rare*; red zeolite, Dunbarton, scarce; yellow calcareous spar, and green fluor

560 Seven minerals various

561 Hexagonal plated spar coating rock crystals, fine, Hartz

562 Flesh-coloured double-pointed rock-crystals with mica, in well-defined hexagonal plates; and purple fluor, Bohemia

563 Singular oriental onachine agate, E. Indies; fortification agate, Palatinate; lapis sanguineus; and two more polished

564 Twenty-seven various exotic fishes

565 The hare globe fish, and the mud fish, from Brasil, both rare

566 A variety of shells of different genera

567 Mytilus discors, and ditto in the byssus, from *New Zealand*; a golden sun, the rayed trochus, and eight other shells

568 The rasp cockle, a spondylus, sundry other shells, and two shell spoons

569 The brown Venus's ear, the pigeon's egg bulla, a vice admiral, the cat's paw spondylus, and sixteen other shells

570 The wampum clam, (Venus mercenaria Linn) section of an Arabian spindle, and a pecten grandis

571 The Moor rhombus, a small Nereid's trumpet, and thirteen other shells

572 Mytili with fuci, from the *Cape of Good Hope*; the bidentated lamp snail, a rare cardium, and six others

573 An oriental lepas, the unicorn scoop, an aculeated frog, balanus tracheosus, *rare*; and eight others
574 A fine melon shell
575 Mytilus Cygneus, a group of tintinnabulum, balanus communis on wood, mactra lutraria, and various other shells
576 The granulated trochulus, *New Zealand*; trochus tuber, the sanded cone, and twelve others
577 A magpie, uncoated, a large limpet, and a leopard porcelain shell
578 Conus nebulosus and hepaticus, a stair case, the white Venus's ear, and eleven others
579 The filleted scoop, a bishop's mitre, section of ditto, and six others
580 A large duck's foot scollop, a spider strombus, and another shell
581 An oriental mother of pearl shell, *one valve polished*, two pectens, section of an alatus, and four others
582 The Prince of Orange's flag chersina, the footman buccinum, and ten others
583 A large Nautilus Pompilius, partially uncoated
584 A small spider strombus, the ruddy dentated oyster, a painted clam, and six others
585 Cyanite, Alps; solid sulphate of barytes; and micaceous schistus, Scotland
586 Frankenburg copper, shirl, and two others
587 A group of calcareous spar in double pointed hexagonal crystals; and white lead crystallised, Scotland
588 Stalactitical calcedony, Cornwall; silver-grained lead ore, galena with white lead, &c.
589 Twenty small minerals including staurolite on blend, manganese, Germany; tin, copper, lead, &c.
590 Donax trunculus, two suns, a brown caterpillar club, and eleven other shells
591 The purple spondylus of Sicily, and the hollow-ridged cockle
592 The long-beaked fig, a rayed mask, a purple gryphus, and six other shells
593 Two wrinkled clubs, two South Sea snakes, the thick clam, and ten others
594 The Chinese window shell, a square pane formed out of a larger one; a polished clam, and three others
595 The yellow seal's paw, the Holland flag chersina, a lepas anatifera, helix janthina, and eight others
596 An arca noæ, a poached egg licium, and four others
597 A French horn snail, an uncoated emerald snail, and seven
598 Section of a needle, a polished bronze limpet, and four others
599 A large polished magpie, a group of balani, and a pecten
600 Three curious Chinese ornaments; a mother of pearl gorget, *Otaheite*; a fish hook, *New Zealand*, &c.

601 The occidental music, section of ditto, a spotted distaff, mulberry trochus, and two needle shells

602 The cinnabar scollop, the cock's wing clam, an uncoated margaritifera, and a panther porcelain shell

603 Chama calyculata, the bleeding teeth nerita, section of the hair-streaked cuma, and nine others

604 The long Barbary and striated Virginian mussel, one valve of the first polished, and a scarce thorny woodcock

605 Madrepora cyathus on a scarce millepore, *Sicily*; the annulated madrepore, and red organ corals, and a piece of a ship's keel perforated by teredines

606 Venus Dione Linn. an uncoated trochus, section of a volute, a scarce bulb, and five other shells

607 The variegated spondylus, from *China*; and a fine zebra trochus

608 The brunette cockle, a harp, a striated fig, and six other shells

609 A many furbelowed clamp, a polished silver bronze limpet, and the yellow variety of the fan scollop

610 The black hammer margaritifera, and a polished pectunculus

611 A scarce balanus, the sieve clam, a rare pecten, section of a cone, a brunette porcelain shell, and an oyster

612 A small spotted melon, a Chinese harp, a group of balani, and a leopard porcelain shell

613 The fluted green dentalium, the violet mouth hystrix, a scarce reverse lendix, chiton olivaceus, and two others

614 The umbilicated variety of Nautilus Pompilius, partly uncoated, a striated cone, and the camp olive shell

615 Solen radiatus, the painted mussel, one valve polished, and a Venus's heart cockle

616 The singular sea snail, from *New S. Wales*; and a rare cardium, from the *Friendly Isles*

617 A scarce triplex, from *Japan*; a knobbed rhombus, *China*; and a spiked alatus

618 A very large Neptune's Trumpet shell, (*Murex Tritonis*, Linn.) elegantly marked, and of the richest colour—from *Otaheite*. Such fine exemplari of this species are extremely scarce

619 Dendritical native gold, Hungary; grey silver, ditto; black stellated manganese, and arseniate of copper

620 Two trays containing asbestos, amianthus, asphaltum, and various other minerals

621 Ditto, containing selenite, and various others

622 A pleasing variety of small specimens, including Brasilian native gold; ditto, Hungary; uranite, &c.

623 Septaria, Isle of Sheepy; and various others

624 Steatite, Cornwall; and four singularly shaped stones

625 Three curiously formed scoriæ from furnaces

626 Various minerals
627 Porcelain earth, Saxony; red asbestos, asphaltum, and sundry others
628 Three various cobalts, and green oxyd of nickel
629 Two trays, containing sundry specimens of apparently volcanic productions, from Devonshire
630 Various small polished specimens of lava; steatite, Saxony; (terra miraculosa) and sundry others—in two trays
631 Dendritæ on sandstone, and a variety of orbicular pyritæ, &c.
632 Double orbicular sparry formation, Finland; asphaltum, Trinidad, &c.
633 A fine specimen of fortification cobalt
634 Salt, beautifully crystallized on the branch of a tree
635 A handsome slab of Florentine marble
636 Steatite, Cornwall; dendrites on sandstone, &c.
637 Three remarkably shaped stones
638 A variety of mineral bodies
639 Copper nickel with green oxyde, and a cobalt
640 A fine double orbicular sparry formation, Finland; septaria, &c
641 Fibrous selenite, and sundry others
642 Three various cobalts, and dendritical nickel
643 Six fossil echini, and three others
644 Asphaltum, Dead Sea; looking-glass cobalt, manganese, and sundry others
645 Large dendrites on sandstone, and various others
646 A mass of fossil wood, and another
647 Fossil shark's tooth, Malta; and six others
648 Fossil antenna of a lobster, and three others
649 Fossil bones of tortoise, Sheepy; and three parts of fossil crabs
650 Nine curious fossil weeds
651 A beautiful impression and the counterpart of a fossil fish, Verona
652 Three curious sponges, millepore, and three corals
653 Two fine branches of the purple *Gorgonia setosa*
654 A capital specimen of Venus' fan, or *Gorgonia flabellum*
655 Pair of horns
656 Sundry ditto
657 Curious double horn of the rhinoceros
658 Antelope's horns, a large pair
659 Horns, a singular lusus
660 Sundry ditto
661 Horns of the Arnée, a noble pair
662 Contorted horns
663 A lusus cluster of three horns of a ram
664 Ram's horns of uncommon size
665 Horns of a stag
666 Twisted horns, curious

667 Pair of ditto of the American moose
668 Horns, various
696 Ditto
670 Large pair of horns
671 Ditto
672 Ditto
673 Ditto, sundry
674 Ramose horns
675 Ditto, curious
676 Very large horns of an antelope
677 Stag's horns
678 Ditto
679 Ditto
680 Ditto
681 Ditto
682 Horns of the ammon
683 Horns, curious
684 Ditto

THE THREE LAST DAYS' SALE.

The present Publication, comprizing the *Three Last Days' Sale* of the Leverian Museum, has been completed and printed previously to those parts which would follow in connected order, for the purpose of making known to distant collectors, some of the leading rarities of this Museum. At the same time it is proper to remark, that care has been taken, not unduly to enrich the three last days' sale at the expence of the days preceding: the magnitude and richness of the Collection, afforded ample means of attaining this object.

It is imagined this portion of the Sale will take place about the middle of June, 1806.

THE SALE

OF

THE ENTIRE COLLECTION

(By Messrs. KING and LOCHEE,)

WILL COMMENCE

On MONDAY, the 5th of MAY, 1806, at Twelve o'Clock,

In the Building now occupied by

THE MUSEUM.

The two Parts of the CATALOGUE already published, (Price 1*s.* 6*d.*) to be had at the MUSEUM; at Messrs. *King* and *Lochée*'s, (the Auctioneers) and at *Hayden*'s Printing-Office, Brydges-Street, Covent-Garden.

Hayden, Printer, 4, Brydges Street, Covent Garden.

CONDITIONS OF SALE.

I. THE highest Bidder will be declared the Buyer; but if any Dispute should arise, the Lot must be put up again.

II. No Advance less than SIXPENCE; above One Pound, ONE SHILLING; above Five Pounds, FIVE SHILLINGS.

III. Every Purchaser is to pay down Five Shillings in the Pound, as Earnest, in Part of Payment, and to give in his Name and Place of Abode, if required.

IV. The Lots to be removed, at the Expence of the Purchasers, within one Day after the Sale; and the Remainder of the Purchase-Money to be paid on or before the Delivery.

V. Upon Failure of complying with the above Conditions, the Money deposited in Part of Payment shall be forfeited. All Lots uncleared within the Time aforesaid, shall be re-sold, by public or private Sale; and the Deficiency (if any) attending such Re-sale, shall be made good by the Defaulters at this Sale.

Gentlemen who cannot attend the Sale, may have their Commissions faithfully executed, by their humble Servants,

King and Lochée.

118 A single crystal of the Saxon topaz, very large and fine

119 Opal in the matrix

120 A capital, and for beauty and magnitude unique, specimen of the true Avanturine, weighing near 5lb. This curious article was found in the ruins of the triumphal arch of Julius Cæsar, in the valley of Suse in Piedmont, in 1788, by the Sieur Francis Ludwig, of Mayence. It takes a very high polish, and is much harder and infinitely more beautiful than the stone commonly known by the same name.*

**The artificial Avanturine has been known for ages, specimens of it being frequently found among the antient ruins of Rome. Some eminent mineralogists have questioned the existence of such a beautiful stone as the natural Avanturine; but the following respectable authorities put the matter beyond a doubt. They are translated from the originals and addressed to Mons.* Ludwig *of* Mayence, *from whom the specimen was purchased for two hundred guineas.*

SIR,—" The Quartz Avanturine that you have been so " obliging as to let me see, merits, by its beauty, the utmost " attention of the amateurs. I have never seen one yet which " more resembles the artificial glass, known by the name of " Avanturine. I am, Sir,

Your very obedient Servant,

Vienna, 12th May, 1790. J. Borne."

" I perfectly coincide with the sentiments of my " friend Mr. le Chevalier Borne, that it is a laminated ferrugi- " nous quartz, of the carnelion colour, abundantly impregnated " with copper-coloured mica, which, by the intimate mixture

" and the different position of the particles, appears to have pro-
" duced the natural Avanturine.
Freyberg, 4th June, 1790. DE CHARPENTIER."

" I have seen with the greatest pleasure the large
" specimen of red-coloured quartz, mixed with mica, belonging
" to Mr. Ludwig, which throws great light on the true origin of
" the Avanturine. It is an unique piece, both on account of
" its size and beauty.
Cologne on the Rhine, 8th Aug. 1790. BARON DE HUPSCH."

" The under-signed attests never to have seen a
" quartz mixed with mica, of such size and beauty. It is usually
" called Avanturine. Dr. CHARLES HENRI TITIUS,
Inspector of his S. H. the Elector of Saxony's
Dresden, 9th July, 1790. *Cabinet of Natural History.*"

" As a zealous amateur of lithology, and possessor
" of a sufficiently compleat collection, I think it incumbent
" upon me to declare that I never have seen an Avanturine of a
" beauty so perfect, and size so uncommon, as that belonging to
" Mr. Ludwig, of Mayence. JOSEPH FREDERICK,
Dresden, 12th July, 1790. *Baron of Racknitz.*"

" The under-signed acknowledges never to have
" seen so large and clear a quartz mixed with glimmer, which
" so compleatly represents the composition known by the name
" of Avanturine. VOSMAER,
Hague, 13 *Sept.* 1790. *Director of the Cabinet of Nat. Hist.*
of the Prince Stadtholder.

" In addition to the foregoing testimonies of the
" great judges in natural history, I must confess never to have
" seen a production in the mineral kingdom which has so much
" excited my admiration, as this wonderful specimen, which I
" had the pleasure of seeing through my acquaintance with its
" proprietor, and which will be of great use, as adding to the
" discoveries in natural history. FRANCIS WILLIAM,
Cologne, Aug. 5, 1790. *Count of Otting, Baldern, & Portern.*
Testor et Obstupea. F. WALLRAB, *Professor at Cologne.*"

105 A snuff box made of lepidolite, handsomely mounted

106 *Superb Ivory Cup*, presumed to be one of the most exquisite works of the kind in Europe

Testimonial relative to the cup, given by Professor Thorkelin. "The ivory cup in the Museum, late Sir Ashton Lever's is an undoubted work of Magnus Berg, a Danish artist, who having been engaged in France, during the reign of Louis XIV. as Medailleur, returned home to Denmark, where he painted on the walls of Friedricksberg, the history of Christian V. and carved in ivory several cups, part of which still remain in the Royal Museum at Copenhagen; and others were made presents of to foreign princes, by his royal master. The life of this truly extraordinary genius, is inserted in the Danish magazine of historic knowledge, 1747.

Magnus Berg died in the reign of Friedrick IV. who was succeeded by Christian VI. in the year 1730.

G. T. THORKELIN."

107 Aqua marine, a very fine and perfect crystal

108 Opal in its matrix, a remarkably brilliant specimen

109 A magnificent Laver, of the curious old *Raphael's ware*; the form an elegant oval, with a recurved edge, and

pointed bottom, which, as well as a raised zone or belt, which encircles the middle of the outside, is wrought in fluted or gadrooned work. Each side is ornamented with a laughing cornuted satyr's head. Two grotesque sphinx-like figures, half satyr, half dragon, with each a double tail, serve as supporters; their arms are extended to the edge, and their hind parts, with wings expanded, underneath, resting on an oval base, which has a hollow gadrooned edge. The whole is painted in the most lively colours, and glazed. On the inside, within a broad grotesque border, is represented a Roman naval engagement; the boarding of two ships by a number of soldiers in boats, sword and shield in hand; sailors fixing their grappling hooks to facilitate the entrance of the assailants, who are opposed by soldiers on board the ships armed in like manner. The outside is enriched with grotesque figures, supporting festoons of flowers, interspersed, among which are birds, military achievements, foliage, &c. This capital and masterly performance bespeaks it the work of first rate genius, and renders it the deserved object of general admiration. It was originally in the Medicean Collection, and, at the time of the Duke of Tuscany's taking possession of that valuable repository, was, by mistake, put out, with other articles, for sale, and purchased by the late Admiral Broderick, for a considerable sum, on whose demise it came into the possession of the late Sir Ashton Lever.
